

Winchester Medical Center

January 2009

The nearly 200 board-certified physicians on the attending staff represent 35 medical specialties, from family practice, gerontology and rheumatology to neonatal intensive care, heart surgery and retina surgery. Winchester Medical Center is a 150-acre campus including a 411 bed, non-profit, regional referred hospital, a medical office building, retail pharmacy, cancer center, outpatient diagnostic and surgery facilities, imaging center with MRI and CT scanning, adult and adolescent psychiatric centers, 250-seat conference facility, two employee child care centers, restaurant, and park and walking trails. Maintaining a breadth of quality services at a reasonable cost has been a point of pride for Winchester Medical Center.

Winchester Medical Center is a subsidiary of Valley Health System, a regional nonprofit "family" of healthcare providers committed to helping area residents manage their health and enjoy a high quality of life. Other System members are Surgi-Center of Winchester, Winchester Rehabilitation Center, two Urgent Care Centers, Warren Memorial Hospital in Front Royal, Valley Home Care, Valley Medical Transport, and Valley Pharmacy.

The six-story Winchester Medical Center opened in 1990 on the west edge of the city. The building was designed for clinical efficiency and patient convenience. With the exception of intensive and special care units, patient rooms are private, with a full-length sofa for a guest, and visiting hours are open, determined by the particular needs of each patient. In 2008, WMC opened a new Health and Wellness facility on the north-west side of campus. WMC also earned MAGNET certification, an honor reflecting the quality of patient care by WMC's nursing staff.
